"Lost"

Verse 1

Situations

Betrayal

Our own thoughts winding out crookedly

Misfortune opportunities

Lost among our dimmed bundle

Lies hiding in truth

Losing games which were forever brought in by your
satanistic eyes

Obstacles surpassing me

Shadows reaching over me

Sun hits deep within

Damaging critically

Chorus

Look for a star

I picked the same one

Where ever we are

Were together

Verse 2

Looking over our soulless situations laughing at the
lifeless tomb

Madness begins in laughter

When reality tilts

And buries crumble

Underneath all of the debris

You'll find me

Laying there breathlessly

Confusion deep confusion flashing past your very eyes

We lived a life of lies now in sorrow you look at me

It was never meant to be

The sun is always following me

Glancing down tragically

Repeat Chorus
