"A Gift To You"

Defend the atomic bomb
We're fed on global pain,
We crawl, we fall, destroy it all,
Cutting each others veins.

Human kind obeys
The unconscious thirst for violence.

So I came, I lived the way,
That told us to stop complain,
It's hard to Real life,
It boils inside the brain.

In other times you'd cry,
Life is cruel, an excuse avoiding fight.
Wash over your mind, a gift to you.

It's day, good night!
Don't pretend you are looking for "the real path of life"

May this be a time to rest.
Proving on you hold control,
Proving as, you were the slide to show,
You run against it all.
