Pain religion
In broken flesh we hide
This seed of death which lies
In every kind of superficial doctrine of our own opinion
Assuring only mind deception
We're a lying breed
Souls infected by the seeds of death and lies
Theories, Common Ground, Elitist, Embryonic,
Polytheist
Doctrine without true salvation
Leaving only moral traces
NO MORE (x4)
CREATION (x3)
One man crucified
In His death all men died
Resurrection from damnation
Simply by his invitation
Bonded by the blood of Jesus
Free from death for all eternity
