Nobody can find you when you're nowhere  
Living on the other side of hope  
Nobody can hurt you when you don't care  
Singing like you're swinging on a rope  
Don't worry if you never have been happy  
Disappointment is your only friend  
It's not like there's nothing to believe in  
Every movie's got to have an end  
What are you waiting for?  
Let's get out of here  
When you've got nothing  
You've got nothing left to fear  
(Yeah, hey) Going nowhere...  
How long can you just go on pretending  
To be yourself when you know that you're not?  
Every movie's got have an ending  
Even when there's not much of a plot  
If your lover used to beat you with his anger (failure)  
If your mother used to tie you to a rock  
Observe your former life preserved in amber  
Like someone pulled the power on the clock
