(m. riperton r. rudolph)

My love is bigger than the sun  
How could I love you more  
Darling it can't be done  
My love is stronger than the tide  
How could I love you more  
No one could even try

You have sailed into my dreams  
So many time  
Calling me to fly away  
And now I wake to romantic fantasies  
The dream is real  
And you are mine

I will love you till I die  
Till the stars fall from the skies  
Till the oceans all run dry  
How could I love you more  
How could I love you more  
How could I love you more  
How could I love you more

My love is bouncing off the moon  
How could I love you more  
Darling we'll be there soon  
My love is softer than the rain  
How could I love you more  
How does a heart explain
