(m. riperton r. rudolph)

My love is bigger than the sun
How could I love you more
Darling it can't be done
My love is stronger than the tide
How could I love you more
No one could even try

You have sailed into my dreams
So many time
Calling me to fly away
And now I wake to romantic fantasies
The dream is real
And you are mine

I will love you till I die
Till the stars fall from the skies
Till the oceans all run dry
How could I love you more
How could I love you more
How could I love you more
How could I love you more

My love is bouncing off the moon
How could I love you more
Darling we'll be there soon
My love is softer than the rain
How could I love you more
How does a heart explain
