It's hard to say goodbye  
To someone else like you  
This time I realize how important you are for me  
But it doesn't mean that I'll leave you this time  
You know I care to hold your hands

I'm here inside waiting  
For your next sweet response  
You were caught in the rain  
I was caught in the rain too  
We can have fun again  
There will be no end  
It's not over yet

It's hard to memorize  
Your face and your delicate smile  
No matter how hard I try  
It always end between you and me  
I need you here to make me feel  
I'll never forget those words you said

I never thought that you could do these things to me  
It's more than what I expected to be  
You captured out my heart when I look gracefully into  
your eyes

It's not over yet
