Please don't let the light through my window  
Keep the curtain shut, it brings me good luck  
Please don't let the light through my window  
Don't wanna see the day, I don't need it anyway

Please don't let the light through my window  
Don't wanna see the shop or the wet bus stop  
Please don't let the light through my window  
The bells ring out for doom at this Sunday afternoon

Please don't let the light through my window  
Please don't let the light through my window  
Please don't let the light through my window  
Please don't let the light through my window

Please don't let the light through my window  
Please don't let the light through my window  
Please don't let the light through my window  
Please don't let the light through my window

Please don't let the light through my window
