# "The Operator"

Visit "[The Operator](#)" on MotoLyrics.com

The operators came and took me away, took me away  
Everybody laughed, remember the day they took me  
away

I know what they're looking for  
Don't think I'll ever know

They laid me on the bed, drilled my head, the incision  
bled  
Put wires in my brain every now and again, I remember  
a name

And as I drift away into my hiding place  
A maze of alleyways where the cameras cannot see

The operators came and took me away, took me away  
Everybody laughed, remember the day they took me  
away  
Remember the day they took me away  
Remember the day they took me away
