"Dont It Make You Wanna Dance"

Visit "[Dont It Make You Wanna Dance](#)" on MotoLyrics.com

I've been gone for so long
it feels so good just to get back home
back to all my friends and all the faces I like to see

and like a rainbow in the sky
a certain twinkle is in his eye
tellin me that they believe in who I am and who I want to
be

don't it make you want to dance
and dont it make you want to smile
when you down and around
down in the country big and sing a while

and dont it make you awant to dance
and dont it make you want to smile
when your down and around
down in the country big and sing a while

oh lord don't it feel right tonight
makin music when the feelings right

feeling better with every little single song
i look around and everyone is a friend
and every single one is bound to grin
and when the chorus comes around everybody jump on

and dont it make you want to dance and dont it make
you want to smile
when youre down and around
down in the country big and sing awhile

and dont it make you want to dance
and dont it make you want to smile
when your down and out
down in the country big and sing awhile

when youre down and around in the country
big and sing awhile
