Let's break the silence of this town tonight  
Alive and kicking like never before  
Now let them know we're still around  
Never gave us much, we still want more

They throw their lives into trashcans,  
wants us to follow into the grey

Like electricity through my veins  
I've got to move or else I will fade  
Their ugly faces, waste of space  
We'll paint the walls with days they stole  
Don't waste my time with empty words  
All the things you said I've already heard  
We've got to know what's outside  
We're not afraid cause we haven't got a choice

This is all that you wanted  
Let's leave the silence behind  
They throw their lives into trashcans  
Wants us to follow into the grey
