

## Miss Li "Spaceship"

Visit "[Spaceship](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Have you heard the news today?  
Just like a fix she's floating through his veins  
Have you heard the news today?  
Like a tumor she spread to his brain

Living isn't easy  
She's gonna mess this up completely and no one can  
hold you down

We can build a spaceship and fly away  
And we can start all over somewhere else  
We can build a spaceship, come with me  
And we can start all over, close your eyes and follow  
me

We can build a spaceship and fly away  
And we can start all over somewhere else  
We can build a spaceship, come with me  
And if Earth is calling, close your eyes and let it be

So have you heard the news today?  
If you listen close you'll hear his heart break  
'Cause in the psycho world of Eden  
This is the version where she is the snake

Living isn't easy  
She messed things up completely and no one can hold  
you down

We can build a spaceship and fly away  
And we can start all over somewhere else  
We can build a spaceship, come with me  
And we can start all over, close your eyes and follow  
me

We can build a spaceship and fly away  
And we can start all over somewhere else  
We can build a spaceship, come with me  
And if Earth is calling, close your eyes and let it be

Things are gone, family too

He turned his back on everything he knew  
He dug for gold and found a grave  
He asked for freedom and became a slave  
And she keeps haunting him and no one can hold you  
down

We can build a spaceship and fly away  
And we can start all over somewhere else  
We can build a spaceship, come with me  
And we can start all over, close your eyes and follow  
me

We can build a spaceship and fly away  
And we can start all over somewhere else  
We can build a spaceship, come with me  
And if Earth is calling, close your eyes and let it be
