

Miss Montreal

"Say What You See"

Visit "[Say What You See](#)" on MotoLyrics.com

Sittin' around in a small town
Where no one knows their way out
But you keep holdin' on
Running away for the last time
But you keep saying the last time
Would be the last one

Don't go wasting
These times you're facing
I know you've been there

Say what you see and don't waste your time
I didn't mean to let you fall down
From the battles of my mind
Time will display all the feelings left behind
I didn't see that you and I
It's fucked up how I'm missing you every day

I'm making it right for the first time
But all I ever find in this town is a smile on a broken
face
I want you to see I've been lost inside
I'm trailing my mind
But I always find that these feelings I can't replace

So don't go wasting
These times you're facing
I know you've been there

Say what you see and don't waste your time
I didn't mean to let you fall down
From the battles of my mind
Time will display all the feelings left behind
I didn't see that you and I
It's fucked up how I'm missing you every day

I hold back all the feelings that I wanna say
It's not good but I'm feeling them anyway
I took for granted everything I ever loved

I hold back all the feelings that I wanna say

It's not good but I'm feeling them anyway
I took for granted everything I ever loved

Woah woah
Woah woah
Woah woah
Woah woah

Say what you see and don't waste your time
I didn't mean to let you fall down
From the battles of my mind
Time will display all the feelings left behind
I didn't see that you and I
It's fucked up how I'm missing you every day

Say what you see and don't waste your time
I didn't mean to let you fall down
From the battles of my mind
Time will display all the feelings left behind
I didn't see that you and I
It's fucked up how I'm missing you every day

Say what you see and don't waste your time
I didn't mean to let you fall down
From the battles of my mind
Time will display all the feelings left behind
I didn't see that you and I
It's fucked up how I'm missing you every day
