

## **Mission To Felspar "Mesothelioma"**

Visit "[Mesothelioma](#)" on MotoLyrics.com

Another lonely symphony  
ensued with complications  
doctor what is wrong with me  
can i get some medication

Keep the lights off  
shut the world out  
i'm dying in misery  
i'm so sorry that my death helped to kill the faith  
i've hoped you would keep i've hoped you would keep

For sake of life and it's legacy believe in me  
believe i'll see you someday again  
believe in that distant shore

Hey family can you deal with this  
cruel death and devastation  
they promise they can make this up  
with the company compensation

Keep the lights off  
shut the world out  
i'm dying in misery  
i'm so sorry that my death helped to kill the faith  
i've hoped you would keep i've hoped you would keep

For sake of life and it's legacy believe in me  
believe i'll see you someday again  
believe in that distant shore
