He's a lean and hungry hunter  
Standing in the cold street corner light  
There in the night  
She's a lonely little dancer  
Out to find a daring new romance  
The girl takes a chance

CHORUS:

They're hunters of the night  
Find their love where they might  
We're all hunters of the night

She can see her lonely stranger  
Standing in the cold street corner light  
There in the night  
She can feel his arms surround her  
Wanting this embrace to never end  
Still once again

CHORUS

He's a lean and hungry hunter  
Standing in the cold street corner light  
There in the night  
She can feel his arms surround her  
Wanting this embrace to never end  
Still once again

CHORUS
