

Mister Mr "Watching The World"

Visit "[Watching The World](#)" on MotoLyrics.com

Rockets launch us to outerspace
Far away from the human wasteland
We're bringing heaven to other worlds
Abandoning the home fires of our birth
There are fool who believe we can't live here as one
There are wisemen who say it still can be done

CHORUS:

Who is watching the world
Who is changing the balance of power
Who is watching the world
Are we building a future or just standing still

We will harvest your fields of wheat
For the promise of food to eat
Forging plows from swords of war
We can stop all this fighting and open the door
Only fool would believe we can't live here as one
Who's to say it cannot be done

CHORUS
