[Chorus:]

I remember the first glance
I remember the first romance
I remember the first dance
When I felt in love with You (repeat x2)
When I felt in love

I thought that I would never know love
And maybe I thought would that I never touch
But then You came and dwelled in me
I thought that I never rocked me
I'd never known a love like this
Show the truth behind of the mist, mystery

(Chorus)

When is all has been said
When is all has been done
When the race has been running
The real life will be come

I will remember Your love (x4)

(Chorus)
