G. Cormier

She slips into her nightgown and falls back on the bed  
The nights get oh so lonely and she thinks about what  
he said

And time offers no comfort, she had marriage on her  
mind

But he wants to stay single and he says he still needs  
time

He said, I'm off to chase my rainbow and to sew my  
wilder seeds

I've got to find that something that's been callin' me

He said I hate to leave you lonely but there's something  
I must do

I'm off to chase my rainbow and I'm leavin' without you

He's been five months down in Dallas searching for a  
dream

Life and all it's glory is just not what it seemed

Home is a cheap hotel room where he falls back on the  
bed

The nights are oh so lonely and he remembers what he  
said

(Chorus)

He said I'm off to chase my rainbow I've sewn my  
wilder seeds

I've got to find that someone who was so in love with  
me

I've had my share of loneliness and there's something I  
must do

I'm off to find my rainbow and it's leading back to you  
Darlin', you're my rainbow and I'm coming back to you
