[Lyrics: - Macey]

The fire in the sky He who gives us light The sun - our  
lord Giver of all life His coming has been the herald  
The dawn of a new cycle For as long as it has been  
remembered It has been this way

He is life eternal The focus of our worship We dared  
not look upon him Until this fateful day

[Solo: - Macey]

His flames diminish! Shadows begin to fall At the apex  
of his journey This cannot be so! In terror i look into his  
heavens I need not shield my eyes Dust rising from  
afar Is swallowing our lord

[Solo: - Macey]

[Solo: - Macey]

The ground trembles In the distance thunders roar His  
powers blast the lands Fierce winds whip up the sands  
How have we displeased him? Not in lack of dedication  
We cower as the skies darken Our lord is nowhere to be  
seen

[Solo: - White]

He did not return Deserting us in twilight Without his  
solar powers Our crops withered and died Terrible  
winter froze the sand Killing the sick old and young Our  
faith is all that binds us to These lands our lord has left  
us to
