I'm in awe of the way that you take control  
I'm in awe of the way that you just let go  
I'm in awe of the way that you understand  
You know that you never need to make demands  
upon my mind there's so much ice  
With just one word you give me such good advice  
You don't think twice  
I'm in awe of the way that you want to stay  
I know it's so easy just to walk away  
Same picture but it's just a different frame  
We're all moving but we're motivated by pain  
I ran so long I forgot to stop  
This road I'm on it takes such a high price

But I can't think twice  
Don't think twice don't think twice  
She said it's the best advice you'll get  
Don't think twice don't think twice  
She said before you wake up dead  
It's advice you can...  
I'm in awe of the way that you set me straight  
I'm in awe of the way that you change my fate  
Too many people talk just to hear themselves speak  
If you choose not to talk they assume you're weak  
I talk so much I'll forget to hear  
The just one word you'll leave inside my ear  
You make things clear
