Paper and cardboard
Upon the floor
Sad girl in the corner
Says she can't live anymore
The party has ended
And he is gone
Sad girl in the corner
Wants me to take her home
Please come through
I wish I didn't have to count on you
Please come through
Please come through
I came here with no one
And no one to find

Sad girl in the corner
Has changed my mind
She takes a big breath
So every candle gets blown
She opens her eyes
To find she's still alone
Please come through
I wish I didn't have to count on your
Please come through
Please come through
Please come through
Please come through
