Verse 1

I looked at you a thousand times
This time when I looked at you,
there was something new, how could I be so blind
We shared our secrets in the dark
and though we were only friends,
I don't know when the feeling changed with in my heart

Chorus:

Baby, ooh I keep it to myself
Baby, Ohh falling in love with you
The harder it gets cause you don't know the pain I'm
feeling
OOh, I keep it to myself
Baby, ooh falling in love with you
I don't wanna push it away cause no one makes me feel
like you do

Verse 2

I dreamed of you all through the night,
Holding you dear to me
right here with me wrapped in my arms so tight

But when I start to tell you how I feel
You tell me about someone new
who's right for you, if you only knew my loves for real,
baby

Chorus

Bridge:

I wonder if you feel the same way I do
then we both could me together forever
So why do I hide all my feelings inside
if I know you're the only one for me
The deeper that it gets the harder that I fall
fall baby... ooohhhh

Chorus and add lib to fade
