From moment to moment, every moment that I live  
I live for every moment with you  
To see you, to touch you, to imagine this will be  
The moment when a dream comes true

Just an ordinary day becomes adventure  
Such sweet adventure I never knew  
And life will be rainbows as I learn the secret of  
The miracle that love can do  
From moment to moment with you

Just an ordinary day becomes adventure  
Such sweet adventure I never knew  
And life will be rainbows as I learn the secret of  
The miracle that love can do  
From moment to moment with you
