I see those empty spaces wandering round and round
Talkin to themselves, talkin to the ground
We all know we're six feet from our grave
But do you really care if your soul is saved

What's that you say?
I know you're young and I know you're not afraid
What's that you say?
But when it's time to go, is that what you'll say?
I'm not afraid
I fear the thought and you finally realize
What's that you say?
All alone in your head, all alone inside
What's that you say?

I knew a man who was hanging on the edge
Falling to his knees with every word he said
And then one day the miracle touch
If not that empty space would have swallowed him up

What's that you say?
I know you're young and I know you're not afraid
What's that you say?
But when it's time to go, is that what you'll say?
I'm not afraid
I fear the thought and you finally realize
All alone in your head, all alone inside
What's that you say?
I don't wanna think about it anymore
I don't wanna think about it anymore

I know sometimes it's hard to read between the lies
But there's a truth that sanity denies
Some people say that it's all left up to chance
But you can't undermine what you don't understand

What's that you say?
I know you're young and I know you're not afraid
What's that you say?
But when it's time to go is that what you'll say?
I'm not afraid
I fear the thought when you finally realize

What's that you say?
All alone in your head, all alone inside
What's that you say?
I know you're young and I know you're not afraid
What's that you say?
But when it's time to go is that what you'll say?
I'm not afraid
I fear the thought when you finally realize
What's that you say?
All alone in your head, all alone inside
What's that you say?
I don't wanna think about it anymore
I don't wanna think about it anymore

All alone in your head, all alone inside
All alone in your head, all alone inside
What's that you say?
All alone in your head, all alone inside
What's that you say?
All alone in your head, all alone inside
What's that you say?
All alone in your head, all alone inside
What's that you say?
All alone in your head, all alone inside
What's that you say?
All alone in your head, all alone inside
What's that you say?
All alone in your head, all alone inside
What's that you say?
