I've come a long way from home  
Just to see you standing here and staring at me like you  
do  
Now I step up, step up, and make my way over to you  
I know you know it's the same old song and dance  
routine that I sing

Late night with Amory, Amory  
Turn your shoulder over and over  
Late night with Amory, Amory  
Move your hips in just a little more you got it, that's it

I get along with my Plateau girl  
One drink for glee, two more and I'll be in the middle of  
a viridian dream  
Now she gets up, gets up, and tells me we got another  
place to be, the walk down  
The walk down St. Denis is long and now it's just her  
and me, the music rings

Late night with Amory, Amory  
Turn your shoulder over and over  
Late night with Amory, Amory  
Move your hips in just a little more you got it, that's it

Late night with Amory, Amory  
Turn your shoulder over and over  
Late night with Amory, Amory  
Move your hips in just a little more you got it, that's it
