I've got a positive outlook,  
Won't get stuck  
Never give in never give up  
Drowning in my surroundings  
Don't let them scare you  
No matter what  
So much hate and jealousy  
All hope is caving in  
Where are you putting your energy?  
Got to put it perspective  
Got to see your objective  
Patience is growing thin  
>From something so long neglected  
Be calm, be brave  
Got to keep yourself alive  
Isn't it what you expected  
As pressure turns to rage  
You solder your own cage  
Not how I want to be That's not for me
