Give me love

Give me love

Give me love

Give me love

At first I was afraid and to sanctify

The woman who stood right by me

She hung me on her wall like a crucifix

Now I cherish and care for her needs

I've made up my mind I want you to stay

I've made up my mind I want you to stay

No llores keep you warm keep you satisfied

No llores give you something to stay alive

I've made up my mind I want you to stay

I've made up my mind I want you to stay

Give me love

Give me love

Give me love

Give me love

And now the police and the FBI

They are tired of looking for me

You hid me somewhere but I can't find the key

It must be deep within your mystery
I've made up my mind I want you to stay
I've made up my mind I want you to stay
No llores keep you warm keep you satisfied
No llores give you something to stay alive
I've made up my mind I want you to stay
I've made up my mind I want you to stay
Give me love
Give me love
Give me love
Give me love
I've made up my mind I want you to stay
I've made up my mind I want you to stay
I've made up my mind I want you to stay
I've made up my mind I want you to stay
Give me love
Give me love
Give me love
Give me love
