Everybody wants in
everybody wants to know
whos the first to say it
whos the best and whos the worst

they're making all your choices
vanity is all you need
if you want it then lets start the show

sex love money with a flag in the sand
dont tell me you dont want it too

everybody dance
i've said what you wanted to hear
i can tell that you already know

everyone is waiting
everyone is speaking low
they wanna know whats next
they wanna know whats gold

guess whats in their hands
the difference is a luxury
is you want it then lets start the show

you look like everyone you know
you talk about what you own
everybody has to know
you're always so original
