Evenings all alone  
Empty-hearted, oh it's gone  
Healing takes too long  
Empty, oh no don't let go

Now you're drinking all alone  
The whiskey warms you to the bone  
Everybody knows your name  
Everybody knows your shame

But the sun shines on.

Evenings all alone  
Broken-hearted, no more hope  
Naked and exposed  
Empty, oh no don't let go.

Now you're drinking all alone  
The whiskey warms you to the bone  
Everybody knows your name  
Everybody knows your shame  
But the sun shines on (x4)

Everybody waits for your next mistake  
Everybody waits for your next mistake  
Everybody waits for your next mistake

The long country drives  
Beneath the Indiana skies  
And I don't know why  
I wanna see the other side
