The wind blew in across the water  
And the wind blew through you hair  
And I walked around the lake's perimeter  
And then I saw you there

I will grab you by the ears  
I will grab you by the ears  
I will grab you by the ears  
And you will know something  
You will know something

I saw the birds fly out across the lake  
I saw the birds go by  
And I walked around the lake's perimeter  
And I saw the lake reflected in your eyes

I will grab you by the ears  
I will grab you by the ears  
I will grab you by the ears  
And you will know something  
You will know something
