There's a rose without a thorn  
A sky without a storm  
It will be  
But it will fade away  
Like a dream we're fighting for  
We all need something more  
It will stay  
But it will fade away  
On a day like this I know  
I just can't let it go

I have been here once before  
But still came back for more

There's a distant memory  
About what you mean to me (what it means to me)  
It will stay  
But it will fade away  
So if you love with all your heart  
Don't be afraid of who you are  
Don't keep/give yourself away  
On a day like this I know  
I just can't let it go  
I have been here once before  
But still came back for more

Come back for more

Give me take me love me hate  
We live we learn we crawl we break  
We grow I know I let you go  
We all need to feel so... (2X)

I need to feel something  
Come back for more
