Don't you dare go away from me

I love you so damn much boy

Why can't you see?

I rather see you dead than with somebody else

Love is quick to brake me down

I couldn't stand it

I rather see you dead than with somebody else

Can't you see how much I love you? Cause you need too!

Maybe then you wouldn't even consider leaving

Not something that you wanna do, believe me

I've been with you for too many years to change it

And the day you said "Forever" I replay it every second

You can't take it back. I'm Sorry. You're stuck with me

Whether you like it or not that's how it's gonna be

Your love is killing me slowly

It's way beyond what's sacred and holy

If I can't have you

I'll make sure that no one will

I'ma love you till death

I'ma love you till death

I can't believe the news today

Wish I can close my eyes and make this go away

How long, how long must we sing this song?

How long, how long?

Your love is killing me slowly

It's way beyond what's sacred and holy

If I can't have you

I'll make sure that no one will

I'ma love you till death

I'ma love you till death

Don't you dare go away from me

I love you so damn much boy

Why can't you see?

I rather see you dead than with somebody else

Love is quick to brake me down

Your love is killing me slowly

It's way beyond what's sacred and holy

If I can't have you

I'll make sure that no one will

I'ma love you till death

I'ma love you till death
