White, like that flag  
But you still hope to stand  
You're lost, and you're scared  
That all the purpose that's built around me  
Will not travel easily  
Still got distance left to run now  
Baby make a run, travel far and then you'll see  
You know where I'm gonna be  
And don't just say it, just to please me  
And I am running, can't you see me?  
This is easy

And as the air escapes my lungs I see you  
The day brings perfect clarity

White, like your grief  
That I'd still like to meet  
You're lost, and you're scared  
That all the purpose that you built around me  
Will not travel easily  
Still got distance left to run now  
Baby make a run, travel far and then you'll see  
You know where I'm gonna be  
And don't just say it, just to please me  
And I am running, can't you see me?  
This is easy  
This is easy for me

She calls down to me, the best of us bleed  
I'm here as you were for me
