1000 bloody horrors on this Halloween
I get so giddy every time I hear you scream
My sick obsession's getting kinda scary
I love it when you kiss me in the cemetery
Baby I knew you were the perfect catch
When you told me that you loved me in the pumpkin
patch
You give me shivers up and down my spine
When your perfect little blood-spattered lips touch
mine

You and I side by side
Gonna die together underneath the dark October sky
You and I side by side
Holding hands forever underneath the dark October
sky

I see you walking through the dusky gloom
Your candelabra leading me to certain doom
Down past the graveyard through the spooky woods
I'm feeling homicidal and you look too good

You and I side by side
Gonna die together underneath the dark October sky
You and I side by side
Holding hands forever underneath the dark October
sky

It's only you and I
And everything's alright
On this unholy night
You can run but you can't hide
The restless dead will rise
Underneath the dark October sky

You and I side by side
Gonna die together underneath the dark October sky
You and I side by side
Holding hands forever underneath the dark October
sky
