In this forgotten space race under my control

Who's returned from the dead?

Who remains?

You know I don't want you

and I never did

I don't want you

and I never will

You wanted more than I was worth

And you think I was scared

And you needed proof

Who really cares anymore?

Who restrains?

You know I don't love you

and I never did

I don't want you

and I never will
