Sweat
on a dancefloor
Shoes
what the hell smell of
just to keep
the flow goes on
learn these simple steps:
Clap your hands to the left and the right
shake your head and go in time
once you've done that dance with your feet
step one in the back, in the front and repeat
We'll teach you
Something new
How to feel
what we feel
The weight of the stars
in just one finger tips
Clap your hands to the left and the right
shake your head and go in time
once you've done that dance with your feet
step one in the back, in the front and repeat
