they sold our names into slavery with their silver  
tongues behind teeth  
like stars break and burst across their knees,  
they leave bruises and memories of their legacy  
are these small words really cutting deep?  
they are not tragedies i know we try, but lets not be so  
weak  
everything that has been before, is with us now  
As we try to see, but we don't know how  
everything that has been before, is with us now  
As we try to see, but we don't know how  
You were born delivered into blood and bone  
And it became you  
so When you face defeat, half of the path is shown  
and we all need that  
That there is life here at all, you know, you know, it  
must be a miracle  
This world will take as soon as you're born, by marking  
you as its own  
Escape is the miracle  
You peel the skin from your busted lips, when they hit  
you you can't feel that  
Now when you move your feet it is like they were cast in  
stone  
And there is nothing that moves that  
That there is life here at all, you know, you know, it  
must be a miracle  
This world will take you as soon as you're born by  
marking you as it's own  
Escape is the miracle  
This world moved and it chose you and me to fulfill its  
destiny  
Your life moved and it chose you and me to fulfill our  
destiny
