

My Glorious "Fire"

Visit "[Fire](#)" on MotoLyrics.com

I am watching everything break down
Thousand lives in china buried under the dust
Bodies in the street after the storm has come
And a family trapped in a fathers lust

In the darkness that we find here
In the cold of these times
Let me burn through the night
Like a flame on a hill lit up to shine

Fire
You wanted a fire
My love is a fire
For you

Gone are the times where the light shone
When killing is a passion and a common one
Rape a soul and leave it as an empty vase
You awake and look into the devils face

And the darkness eats the planet
Covers everything in grey
If it weren't for a spark that is love
Would you turn your face away

Fire
You wanted a fire
My love is a fire
For you
