"Dust Devils And Cosmic Storms"

Visit "[Dust Devils And Cosmic Storms](#)" on MotoLyrics.com

Flashing holograms of artificial life
In the darkest corners of the very mind
Away this chemical institution of oblivion
Discarded memories veiled in confusion

Pictures in my head like fiction
Blending through the night-veiled kingdoms...
Gruesome revelations

Dust devils and cosmic storms spinning around my
head
My particles accelerating, angels dust to burning winds
of red
Face twisting and quantum erasing
Time particles accelerating
Pihelated spiral ways to Sirius
This is the ultimate versus terminus

Born of memory-projecting termination device
Supercharger if the planetary demise
Sweet and genocide dreams I see of a mankind
Like the cleansing rain...
Wash away to reign

The storm is breaking to change everything
The storm is invading... Erasing... Re-breeding

Dust devils and cosmic storms

Rapid eye movement deciphering the secret windows
Spark the endless leaps to unknown
Non-gravitational motion through the hidden kingdoms
Universe beyond expanding black holes

Like a perfect chaos of macrocosmic scales
Astronomical body's hidden gateways
Blazing like a vortex, across the brain
In layers of the cortex, peel off the pain
