And if I started a chase to make a fire
Heaven would send evil to you
To escape from falling, I would forgo suffering
You are what I loathe anyway
And I would fight my way out. Nothing hold me back

And I will throw you away from me, sure.

And it would take another part of what I try to
Make survive through us, baby
Cry, if you want to fake, this is better for u
Honey, fake it's better
And I will take the other way

I forsake, love makes me afraid
I forsake, love by the sinner. Set me free

Cause your tears, oh they will never touch me
It's hard to strike me
Darling, love is boring. Set me free
Cause I'll take the other way

Hey you want to make this love, make sure
Little baby, you can let me down
I'll be ok cause I don't care

Cause I'll take the other way
