Utterly improved slasher purity through defection
A symbol of withhold and the detection
Conceal the hands that cut the throat
Sense the land under the dark coat

Hey man, tired of being a loser?
Tired of being a redneck?
What about a fucking wreck?
I think you should put your life under check

Hostility ends any conflict
Just take out any of the specimen click
C mon, just give hate a chance
It s not the worst you could possibly adhere to

Chaos theory, listen and submit
Your life seems to be like shit
So, it s utter human murder
What prevents us from going any further?
