### "Your time will come"

Visit "[Your time will come](#)" on MotoLyrics.com

We've got too many choices in a this here life  
We've got to narrow it down, got to cut out the strife  
Desegregate between the work and the fun  
Then you will find your work is easily done  
Nuff opportunities staring you down  
You no feel like I feel take a good look around  
You can live every day without everyday struggle  
Cut out the rest we don't need no more trouble

Just keep your head moving in the right direction  
Your time will come, but you've got to seize it yeah

Uplift your spirits  
Let Jah love rain down upon us  
In every way now

Nuff temptation come to rot in your soul  
Don't let those drugs come and take your control  
Of your life, your love, your world, and your dreams  
It'll happen if you let it even though it seems  
You've got a strong mind and you know what's right  
Soon enough you're giving up the fight  
Just stay on your path and don't stray that way  
If you're patient enough you'll have your day
