"Together"

Visit "[Together](#)" on MotoLyrics.com

Although this brandy clouds the mind
I clearly find that you're the summit of this party.
Excuse my falter it's the booze
More likely you,
When Im in love Im always nervous
Cant we exchange numbers and names
Id love to entertain you
Together forever,
Well keep our promises
Well seal our future with I do, the ring, the kiss
Together forever,
Well keep our promises
Well seal our future with I do, the ring, the kiss
A few months passed since we first met,
Im hoping that, this didn't end before it started
I know it's you, I know you think so too, why don't you
say it?
Together forever,
Well keep our promises
Well seal our future with I do, the ring, the kiss
Together forever,
Well keep our promises
Well seal our future with I do, the ring, the kiss
Every step, took a while
But we found a way to the next round
In spite it took us time
We crossed our ways, wont separate
Its nice to see, you belong with me
Together forever,
Well keep our promises
Well seal our future with I do, the ring, the kiss
Together forever,
Well keep our promises
Well seal our future with I do, the ring, the kiss
