Open the door
Tumble and throw
Close me in
Under your shadow
I wanna fall away

My eyes ahead
Mind apart
Into the wind
Running so hard
I wanna fall away
Out of submission throw me away
My consolation
You are not my saviour

Uncover me lost
I've been stolen
Pray for my soul
Make me whole again
I wanna fall away
Out of your favour
Into my own revelation
You are not my saviour

What did you tell me last night in bed?
There's nothing more useless than what's in your head
Don't be filling your mind with what you don't need to
know
Just be feeding my stomach when I come home

I wanna fall...
(You)
I wanna fall...away
Out of your favour
Into my own revelation

You are not my saviour
