Sonny step right up into the time machine
we'll set the dial for 1983
To the DKs right down in Wilmington
Nightsticks swinging, tear gassed air turns green
In the time machine. Time machine!

We took our lumps and ran between the casualties
Buick full of bloody rags, and black flag cassettes
I think I liked em better with Dez Cadenza.
Sonny are you still too cool? How did you like your day
at school
In the time machine. Time machine

Put you in a time machine, put you in a time
machine see how you do.
