Winter ice - Terminal frost  
Closing eyes of the equinox  
Dimensional change - darkening skies  
The sphere is shackled till dusk

Prophet dreams - ride the winds  
As black holes open for devouring  
Universal chaos in the realm of time  
Surface of earth - covered in rime

From beyond enter the horror  
Of a dark and hideous nature  
The fall of man is now at hand  
Awakened from an ancient slumber  
The immortal ones return  
The earth is theirs once again

Stricken, cursed - frozen damnation  
Man's fall to perpetual domination  
Time trapped in between changes  
Frigid return to the chamber of ages
