I've never had a sign above my head  
Saying walk all over me  
Once I leave I don't regret the things I did  
And I like strange relationships  
I rely on me, myself and I  
If I lose my way so what, I tried (I tried)  
Are you still interested?

Wouldn't want you breathing down my neck  
Expect horizontally  
Even I'm not sure of what comes next  
I let it flow naturally (oh yeah..)  
The party goes where I go  
Mad, bad, and dangerous to know (to know..)  
Can you handle it?

So, before you get to know me  
Open wide your dirty mind  
Who knows where it could lead  
If you leave a little room  
For the unexpected  
The more you get to know me (know me..)  
You'll wonder how you lived without it  
Take all the love that you need  
But leave a little room  
For the unexpected

I live my life in overdrive  
Put the needle in the red  
All my senses working overtime  
Got a crazy kinda Zen  
Step inside, new rules apply  
If you're ready just call me tonight

So before you get to know me  
Open wide your dirty mind (dirty mind!)  
Who knows where it could lead  
If you leave a little room  
For the unexpected  
The more you get to know me (know me..)  
You'll wonder how you lived without it (unexpected..)

Take all the love that you need  
But leave a little room  
For the unexpected

So before you get to know me  
Open wide your dirty mind  
Who knows where it could lead  
If you leave a little room  
For the unexpected  
The more you get to know me (know me..)  
You'll wonder how you lived without it  
Take all the love that you need  
But leave a little room  
For the unexpected

Just so you know  
I'm fire without smoke  
I'm bass without buzz  
Let's see how low we can go  
Wherever ever we land  
It's out of your hands  
So many beautiful things  
You can't control

unexpected... yeah...

So before you get to know me  
You'll wonder how you lived without it  
Take all the love that you need  
But leave a little room  
For the unexpected

So before you get to know me  
You'll wonder how you lived without it  
Take all the love that you need  
But leave a little room  
For the unexpected

unexpected  
But leave a little room for the unexpected
