Excuse me did you call yourself a love expert
Studied, graduated and qualified to show me what it's
all about?
Honey, talk is cheap, you gonna have to convince me

Did you say, I've got a lot to learn?
Well, don't think I'm trying not to learn
Right here is the perfect spot to learn
Teach me tonight

Starting with the A, B, C of it
Right down to the X, Y, Z of it
Teach me the whole mystery of it
Teach me tonight

The sky's a blackboard high above us
And if a shooting star should fly by
I'll take that star and write, 'I love you, I love you'
A thousand times across the sky

One thing isn't very clear, my love
Should the teachers stand so near, my love?
Graduation's almost here, my love
Come on and teach me tonight

The sky's a blackboard high above you
And if a shooting star should fly by
I'll take that star and write, 'I love you'
A thousand times across the sky

One thing, one thing isn't very clear
Should no teachers stand so near
Graduation's almost here, my love
Come on and teach me tonight
Graduation's almost here, my love
Teach me, teach me tonight
