welcome to my life now go away
I gave you a glimpse and that's all you'll ever see
things aren't going well just let me forget
turn away right away your time is complete

custom made me- you don't understand
this is no place for you to be
turn away turn away, my own set of problems
turn away turn away, from the custom made me...

who am i? why am i? no more im through
this life..what is life there's barely any good
enough is so tough so leave me alone
no way go away you'll never know anymore

custom made me- you don't understand
this is no place for you to be
turn away turn away, my own set of problems
turn away turn away, from the custom made me...

Doctor, doctor tell me what's wrong
mom and dad what happened to me
noone knows the depth of the pain
why am I so down custom made me..

custom made me- you don't understand
this is no place for you to be
turn away turn away, my own set of problems
turn away turn away, from the custom made me...
