imagine that you are far away,
dreaming of another day.
in this place everythings fine.
and joy is finally mine

no tears can fall from your face
in this joyous happy place.
ill go there one day real soon,
even though its farther then the moon

i can help me, you can too,
this is what we need to do,
we need to go to that faraway place
where i can wear my happy face

dont wanna spend another day,
wondering what i should say,
i want to be in control-
and get out of this endless hole

dont want you to lead my life,
i dont want to hold this knife,
let me out please let me go,
dont say never dont say no

i can help me, you can too,
this is what we need to do,
we need to go to that faraway place
where i can wear my happy face

let me out please let me go,
dont say never and dont say no
i need to go very soon
to that place on the other side of the moon..
